

MEKOLLE ASHLEY

JUNIOR AI / DATA SCIENCE DEVELOPER

CONTACT

+237 676 157 452
Mekolleashleyam@gmail.com
Buea, Cameroon
github.com/AshleyMekolle

SKILL

- Python (Pandas, NumPy, Scikit-learn)
- XGBoost / Machine Learning
- SHAP (Explainable AI)
- Exploratory Data Analysis
- FastAPI (ML Model Serving)
- Data Preprocessing / Feature Engineering
- Predictive Modeling
- Kaggle / Jupyter Notebooks
- SQL / MySQL
- React + TypeScript
- Firebase
- Git / GitHub

LANGUAGES

- English
- French

AWARDS

- Two-time awardee, Kate Kanyi-Tometi Scholarship Fund
- Two-time awardee, Presidential Excellency Award

PROFILE

Junior AI and Data Science developer with hands-on experience in machine learning model development, exploratory data analysis, and AI-integrated application engineering. Proficient in Python, XGBoost, and SHAP explainability. Experienced deploying ML models via FastAPI microservices and applying data science fundamentals to real-world healthcare and business problems.

EDUCATION

University of Buea 2022 – 2026
Bachelor of Engineering | Software Engineering
Horizon Bilingual Educational Complex, Douala 2020 – 2022
High School | Advanced Level Certificate

EXPERIENCE

Software Engineering Intern Sept 2025 – Mar 2026
Teksynapse.AI

- Worked within an AI-focused engineering environment, gaining exposure to production ML-adjacent system development
- Contributed to backend services that processed and served data for AI-driven application features
- Applied software engineering best practices in a team building intelligent software products

No-Code Automation Engineer Oct 2025 – Dec 2025
HNG Tech

- Designed data routing and processing pipelines connecting Airtable, Jotform, and external APIs
- Automated data collection workflows that fed structured datasets into downstream reporting systems

Software Developer Dec 2025 – Jul 2026
Nexora Dynamics

- Built data-integrated mobile application features with structured API-driven data flows
- Implemented cross-platform data synchronization between application frontend and backend services

Frontend Development Intern Aug 2025 – Sept 2025
Camsol Technologies

- Developed data-displaying frontend components in TypeScript, enabling clear visualization of application state

PERSONAL PROJECTS

- Noura: AI-powered early pregnancy risk prediction platform: trained and deployed XGBoost classification model with SHAP explainability for interpretable clinical predictions; FastAPI ML microservice serving real-time inferences; Django backend with React + TypeScript frontend; React Native mobile client (near-production)
- ML Applications Collection: Python machine learning repository covering four business domains: house price prediction (Random Forest, Gradient Boosting, Neural Networks), sales forecasting (ARIMA, LSTM, Prophet), and product price prediction (Linear Regression, XGBoost) evaluated with RMSE, MAE, R², MAPE
- Dispatch: AI agent automation platform integrating Claude AI API for intelligent task orchestration; FastAPI backend processing automated business workflows (active MVP)
- Content Creator Intelligence System: Automated data extraction and enrichment pipeline pulling structured creator analytics from YouTube and Twitter/X into Airtable dashboards for insight-driven decision-making
- File Sharing App: Python socket-programming project demonstrating data serialization and structured binary transfer over local networks.
