SKILL

- React / Next.js
- TypeScript / JavaScript
- Laravel + PHP
- Node.js
- MySQL / REST APIs
- MVC Architecture
- React Native
- Firebase
- Python
- Git / GitHub
- Flutter
- No-Code Automation

LANGUAGES

- English
- French

AWARDS

- Two-time awardee, Kate Kanyi-Tometi Scholarship Fund
- Two-time awardee, Presidential Excellency Award

PROFILE

Full-Stack Software Engineer with hands-on experience building scalable web applications using React, Next.js, TypeScript, and Laravel. Skilled in RESTful API development, MVC architecture, frontend component design, and backend integration. Passionate about delivering clean, maintainable code and full-cycle product development from database to UI.

EDUCATION

University of Buea 2022 – 2026
Bachelor of Engineering | Software Engineering
Horizon Bilingual Educational Complex, Douala 2020 – 2022
High School | Advanced Level Certificate

EXPERIENCE

- Software Engineering Intern** Sept 2025 – Mar 2026
Teksynapse.AI
- Engineered and maintained backend features using Laravel and PHP, following MVC architecture patterns
 - Developed RESTful APIs consumed by frontend clients, ensuring clean separation of concerns
 - Collaborated on full-stack feature delivery across backend logic and frontend integration
- Software Developer** Dec 2025 – Jul 2026
Nexora Dynamics
- Built and shipped cross-platform mobile features using Flutter and FlutterFlow
 - Contributed to frontend development with component-based UI implementation
 - Coordinated with backend teams to integrate APIs into mobile and web surfaces
- No-Code Automation Engineer** Oct 2025 – Dec 2025
HNG Tech
- Automated multi-step business workflows using n8n, Zapier, and Make
 - Built data integrations connecting Airtable, Jotform, and external APIs
 - Reduced manual processing time by designing reusable automation pipelines
- Frontend Development Intern** Aug 2025 – Sept 2025
Camsol Technologies
- Developed responsive, accessible UI components using Next.js and TypeScript
 - Implemented reusable component libraries aligned with design system guidelines
 - Optimized frontend performance and ensured cross-browser compatibility

PERSONAL PROJECTS

- Noura: AI-powered early pregnancy risk platform: React + TypeScript frontend, Django backend, FastAPI ML microservice serving XGBoost predictions with SHAP explainability; near-production
- Dispatch: AI business automation agent: FastAPI + React + TypeScript, integrating Claude AI, Gmail, and WhatsApp for orchestrated workflow automation (active MVP)
- WeatherSphere: Deployed full-stack JavaScript web app (Vercel) enabling users to post and search real-time weather conditions; live at weather-sphere-theta.vercel.app; features weather API integration and user-generated content
- Blue Ribbon Website: Production React + TypeScript site with reusable component architecture and responsive UI optimization
- File Sharing App: Python socket-based local network file transfer system with secure peer-to-peer transfer logic
