- Two-time awardee, Presidential Excellency Award

PROFILE

Mobile Application Developer specializing in cross-platform development with Flutter and React Native. Experienced in building performant, user-centric mobile applications with Firebase integration, mobile-first UI design, and end-to-end feature delivery. Passionate about intuitive mobile experiences and scalable app architecture.

EDUCATION

University of Buea 2022 – 2026
Bachelor of Engineering | Software Engineering
Horizon Bilingual Educational Complex, Douala 2020 – 2022
High School | Advanced Level Certificate

EXPERIENCE

- Software Developer** Dec 2025 – Jul 2026
Nexora Dynamics
- Delivered cross-platform mobile features using Flutter and FlutterFlow targeting iOS and Android
 - Implemented responsive mobile UI layouts and custom component flows for production applications
 - Integrated backend REST APIs into mobile surfaces, ensuring data consistency and offline resilience
- Software Engineering Intern** Sept 2025 – Mar 2026
Teksynapse.AI
- Contributed to server-side features powering mobile client applications using Laravel and PHP
 - Built and tested API endpoints consumed directly by mobile frontends
 - Collaborated in a cross-functional team delivering end-to-end product features
- No-Code Automation Engineer** Oct 2025 – Dec 2025
HNG Tech
- Automated notification and data-sync workflows supporting mobile app backend pipelines
 - Integrated third-party service APIs into workflow automation systems using n8n and Zapier
- Frontend Development Intern** Aug 2025 – Sept 2025
Camsol Technologies
- Built reusable UI components in TypeScript, directly transferable to React Native surfaces
 - Applied responsive design principles consistent with mobile-first development practices

PERSONAL PROJECTS

- Selah: Cross-platform React Native Bible learning app featuring Firebase authentication, interactive lesson modules, quiz system, and user progress tracking; mobile-first UX across iOS and Android
- Noura: React Native mobile client for an AI-powered pregnancy risk prediction platform; cross-platform app interfacing with FastAPI ML microservice and Django backend (near-production)
- Dispatch: Mobile-enabled AI automation agent with WhatsApp integration for business communication workflows (active MVP)
- Blue Ribbon Website: Responsive web application built in React + TypeScript with mobile-optimized component architecture
- File Sharing App: Python local network file transfer utility with socket-level peer-to-peer data exchange
