SKILL

- n8n / Zapier / Make
- AI Agent Development
- Workflow Orchestration
- Airtable / Jotform
- Claude AI / OpenAI API
- FastAPI / REST APIs
- React + TypeScript
- Gmail / WhatsApp Integration
- Business Process Automation
- Python
- Firebase
- Laravel + PHP

LANGUAGES

- English
- French

AWARDS

- Two-time awardee, Kate Kanyi-Tometi Scholarship Fund
- Two-time awardee, Presidential Excellency Award

PROFILE

AI Automation Engineer with experience designing and deploying intelligent workflow automation systems for business operations. Skilled in orchestrating multi-step automation pipelines using n8n, Zapier, and Make; integrating AI APIs and communication platforms; and building no-code solutions that eliminate manual processes. Actively developing AI-powered automation products targeting SMB efficiency at scale.

EDUCATION

University of Buea 2022 – 2026
Bachelor of Engineering | Software Engineering
Horizon Bilingual Educational Complex, Douala 2020 – 2022
High School | Advanced Level Certificate

EXPERIENCE

No-Code Automation Engineer Oct 2025 – Dec 2025
HNG Tech

- Designed and deployed multi-step automation workflows using n8n, Zapier, and Make for business clients
- Built Airtable and Jotform integrations that automated data collection, routing, and reporting pipelines
- Reduced client operational overhead by replacing manual processes with scalable no-code automation systems

Software Engineering Intern Sept 2025 – Mar 2026
Teksynapse.AI

- Contributed to AI-adjacent backend systems handling automated data processing workflows
- Developed API integrations enabling automated data exchange between business platforms
- Worked within an AI-focused software company, gaining exposure to production AI system development

Software Developer Dec 2025 – Jul 2026
Nexora Dynamics

- Built cross-platform application features with automated API-driven data synchronization
- Implemented workflow-connected mobile features integrating third-party service APIs

Frontend Development Intern Aug 2025 – Sept 2025
Camsol Technologies

- Developed frontend interfaces for workflow-connected business tools using Next.js and TypeScript

PERSONAL PROJECTS

- Dispatch:** AI-powered business automation agent (active MVP): FastAPI + React + TypeScript platform orchestrating AI agents (Claude AI), Gmail outreach automation, WhatsApp communication workflows, and bulk personalized messaging for SMB operations
- Automated Order Management System:** End-to-end business automation built with Jotform, Airtable, and Make; automated order intake, stock-level alerts, customer confirmation emails, payment reminders, and loyalty triggers; live public Make scenario and Airtable dashboard
- Content Creator Intelligence System:** Automated data extraction pipeline using Make to pull and enrich creator profiles from YouTube and Twitter/X into a structured Airtable database with analytics dashboards for campaign targeting and partnership evaluation
- Noura:** AI-powered healthcare platform featuring FastAPI ML microservice, automated pregnancy risk scoring pipeline, and SHAP-driven explainability layer (near-production)
- Selah:** React Native app with Firebase-automated user authentication and progress tracking.
